

# Inspur Selects Netlist As A Strategic Supplier Of Non-Volatile Memory

August 2, 2016

IRVINE, Calif., Aug. 2, 2016 /PRNewswire/ -- Netlist, Inc. (NASDAQ: NLST), announced today that Inspur has selected ExpressVault 3 (EV3) as part of its media streaming application solution set to enable its customers to deliver high performance media cost-effectively.

Netlist's EV3 is a PCIe based non-volatile memory solution that accelerates data as a block interface or as a load/store device. Non-volatile memory is used in conjunction with SSDs and HDDs to shape and smooth IO patterns in order to deliver unparalleled performance in a cost-effective manner. EV3 is at least five times faster than the world's fastest solid state drive in a sustained write environment. Combined with unlimited write endurance, EV3 can be used as an IO shock absorber that delivers unprecedented system performance.

"Inspur develops solution sets for a wide range of industry challenges. Media acceleration can be an expensive problem to solve with current solutions. Using Netlist's EV3, we have designed a system that delivers unparalleled value and performance for our customers," said Neil Sun, General Manager of Inspur Storage.

"Netlist works closely with major OEMs and Hyperscalers across the globe to empower and accelerate high performance computing. We are very pleased to partner with Inspur on EV3, our leading non-volatile memory solution," said J.B. Kim, Netlist's Executive Vice President of Asia Sales.

## About Netlist, Inc.

Netlist creates solutions that accelerate turning data into information and a leader in non-volatile memory solutions for appliances and open systems. The company produces next generation persistent memory solutions that enable businesses to transact quicker, gain insight faster, and reduce datacenter costs. Flagship products NVvault® and EXPRESSvault™ accelerate system performance and provide mission critical fault tolerance. HyperVault®, Netlist's next-generation architecture, expands the performance and capacity of memory channel storage. The company holds a portfolio of patents, many seminal, in the area of hybrid memory, rank multiplication and load-reduction, among others. Netlist is part of the Russell Microcap® Index.
