About Netlist

Netlist provides high-performance SSDs and modular memory subsystems to enterprise customers in diverse industries. Flagship products NVvault® and EXPRESSvault™ enable customers to accelerate data in their servers and storage and reliably protect enterprise-level cache, metadata and log data in the event of a system failure or power outage. HybriDIMM™, Netlist's next-generation storage class memory product, addresses the growing need for real-time analytics in Big Data applications, in-memory databases, high-performance computing and advanced data storage solutions. Netlist also manufactures and provides a line of specialty and legacy memory products to storage customers, appliance customers, system builders and cloud and datacenter customers. Netlist holds a portfolio of patents, many seminal, in the areas of hybrid memory, storage class memory, rank multiplication and load reduction. To learn more, visit www.netlist.com.
